Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 31-34 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by US 4983437.

The reference discloses an optical recording medium having a removable protective layer thereon (col. 2, lines 50-52) where the protective layer may include a colorant for UV protection (col. 3).

Claims 32-34 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by US 4556968, US 5787069, US 5912875, and US 5935673.

All four references disclose a removable plastic protective layer for an optical recording medium. See abstracts.

Claims 32-34 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by US 6463026 and US 2003/0218971.

The references discloses a removable plastic protective layer for an optical recording medium. See '026 abstract and '971 paragraph [0040].

Claim Rejections - 35 USC § 103

Art Unit: 1774

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 31 is rejected under 35 U.S.C. 103(a) as being unpatentable over all of the above references and US 6319581 or US 6475589.

The references cited in the preceding rejections disclose removable plastic protective layers for optical recording media. It is recognized that the references are silent as to the addition of a UV absorber. However, both '581 and '589 disclose that it is known to include UV absorbers in protective layers for optical recording media. See '581 col. 7-8 and '589 col. 10-11. Therefore, it would have been obvious to one of ordinary skill in the art to include the UV absorbers of '581 or '589 in the above cited references. One would be motivated by the reasoned expectation of obtaining the light protective properties of the '581 or '589 protective layers in the above cited media.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references cited disclose protective layers for optical recording media.
